

# Water-based Inkjet

An expanded range of papers and films

Water-based inkjet is growing rapidly, thanks to faster printers, excellent print quality and minimal capital investment. Until recently, limited availability of suitable materials (especially films) has held the technology back - but that has now changed.

Both paper and film labels available from Avery Dennison give outstanding print results on water-based inkjet printers. They also come with exemplary technical support, so users can invest with confidence in platforms such as Memjet-powered and traditional desktop models.

Avery Dennison offers 20 years of digital inkjet expertise, and highly trained local product specialists are always on hand to make sure that your applications are successful. Our new coated films give you entirely new inkjet application opportunities, with clear and silver options and a service that encourages small-scale production runs. There is also an extensive range of glossy and matt water-based inkjet paper products, supplied with our EXACT service dedicated to your key needs: flexibility and speed.

## KEY FEATURES

- > Expanded film portfolio for Memjet, Epson and other water-based inkjet printers
- > Qualified for pigment- and dye-based printers
- > Expanded drum label selection
- > Proven glossy and matt paper products
- > Main papers on EXACT 1000 service
- > Main films on Ready Width service (MOQ 200m<sup>2</sup>)
- > Instant drying
- > Excellent print quality

## APPLICATION AREAS

- > Customised labelling for batches <500 labels
- > Food labelling
- > Craft beverages labelling
- > Home and Personal Care labelling
