

Food contact statement for adhesive C3

Avery Dennison adhesive C3 has been tested by a certified laboratory and has received a certificate of compliance.

C3 complies with European food regulation 1935/2004/EC and with the German Recommendation (BfR) XIV. It also meets the demands of the limit values laid down in 10/2011/EU.

In accordance with the requirements of relevant EU food regulations, the adhesive C3 may safely stand in direct contact dry, moist non-fatty foodstuffs. Furthermore, the seams (edges) of the label material may safely come into direct contact with foodstuffs.

The ratio of food contact surface area to volume when considering labels on a package is 6 dm²/kg.
The ratio of food contact surface area to volume when considering direct labeling on foodstuffs is 2 dm²/kg.

According to FDA regulations, the adhesive may come into direct contact with dry foodstuffs, or alternatively it must be separated from the foodstuffs by a functional barrier.
