

Select Solutions™ Automotive Portfolio

Performance that goes the distance

Labels for the automotive segment have to cope with a range of challenges – harsh chemical environments, challenging substrates and the stresses imposed by vehicle wear and tear.

The Select Solutions Automotive portfolio contains materials with proven performance in the most extreme environments, meeting the needs of all supply chain processes, industry regulations and OEM testing parameters.

Featuring a suite of high performance adhesives:

- > S8001—An emulsion-based product that's economical, yet high-performing on a wide range of surfaces, and in a variety of environments.
- > S8015—A solvent-based product that's high performing on many difficult-to-label surfaces, like varnished substrates.
- > **New!** S8029—Designed for low surface energy and filled plastic substrates. S8029 is a rubber/acrylic hybrid product.
- > S8049—A proprietary rubber/acrylic hybrid product, S8049 is well-suited for use in applications where labels must adhere to oily, low surface energy, rough substrates.
- > S8092—A silicone-based product that has high adhesion to silicone substrates and silicone coated surfaces.

Key features

- > Full range of self-adhesive materials, including multiple facestocks and adhesives
- > Excellent adhesion to a wide range of substrates, including rough and low surface energy plastics
- > High temperature and chemical resistance
- > Durable performance in harsh environments
- > Compliant with REACH, RoHS, IMDS and common testing parameters specified by automotive OEMs

Application Areas

- > Exterior: Fuel cap, tire pressure and tracking/service labels
- > Interior: Airbag, security/anti-counterfeit, warning, instruction and tracking labels
- > Under-the-hood: Labels for heat/chemical-resistant warnings, engine component instructions, tracking, fluid containers, car batteries and cables
