

Materials for Applications Requiring Crisp Print

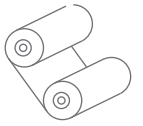

Rapid-Roll® Thermal Transfer Tag Portfolio

When the ability to scan items for tracking and inventory purposes is imperative – no matter the environment – the Rapid-Roll Thermal Transfer Tag Portfolio offers sound solutions. Featuring bright white, smooth surfaces, our thermal transfer tag materials allow for crisp, quality printing of barcodes for the effective collection and transfer of information.

With a smudge- and chemical-resistant surface for printing, end users are ensured images can be scanned in visible and infrared light with transmission to small printers if required. Plus, the material's lay-flat characteristics provide a large scope of where the materials can be utilized.

Applications

- > Event ticketing
- > Retail
- > Shipping and distribution
- > Inventory and tracking
- > Mailing
- > Cold storage and freezers
- > Product identification
- > Office

*Both sides are warranted for flexographic printing. Both sides can be thermal transfer printed with proper machine and ribbon combinations, but thermal transfer printing is not warranted. Consult the Fasson Rapid-Roll® Paper and Tag Thermal Transfer Ribbon Compatibility Matrix at label.averydennison.com for ribbon recommendations. Fit for use testing is recommended for all applications.

For samples and to learn more about the Thermal Transfer Tag Portfolio, contact your sales representative.
