

# FSC® - Certified Products

## Sustainable Materials for a Responsible World

### Avery Dennison Sustainability Commitment

Sustainability is rooted in our company values and has long been part of our approach to business. Today, it drives us to work collaboratively across our entire value chain to address the environmental and social impacts of product packaging, labeling, retail branding and graphics materials. Our aim is to improve the sustainability of our products and processes, while helping to create shared value for all of our stakeholders.

### A Force for Good

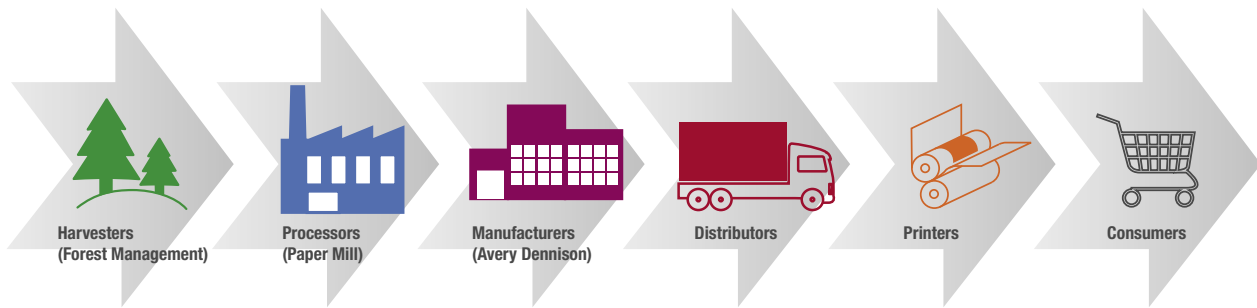

Reflecting our commitment to innovations that contribute to the environmental health of our planet, our collection of Forest Stewardship Council™ certified products are designed

to meet the demand of converters and brand owners seeking more sustainable labeling solutions. Compared to non-certified alternatives, these products are priced neutral to encourage use of sustainable materials.

### Chain-of-Custody Certified

FSC® is considered the most rigorous, credible forest certification system available, promoting environmentally sound, socially beneficial and economically prosperous management of the world's forest. It's chain-of-custody (CO) certification process traces the path of products from forests through the supply chain, verifying the FSC-certified material is identified or separated from non-certified material throughout. Avery Dennison is one of more than 3,500 COC-certified companies in the United States offering more than 170 FSC-certified products.

### CoC Certification: Forest to Final User
